PARKING OF CIVILIAN VEHICLES AT FIRE SCENES

JAN 1990
SEPT 1999

Firefighters should attempt to limit the number of vehicles at the scene fire scenes as possible.

When a firefighter does take his or her own vehicle to the scene it shall be parked on the same side of the road as the fire and in such a manner to allow the passage of truck and apparatus traffic without their needing to travel on the shoulder of the road in order to pass. When possible, vehicles will be parked completely off the road.

Firefighters who do not comply with this procedure will be requested to remove their vehicle to a clear area. If the same firefighters continue to park on the wrong side of the road or park in such a manner to hinder the passage of apparatus they may face suspension or dismissal from the department
