

## Beach Advisory – July 26, 2005

Bacteria levels at Little River and Batsons River at Goose Rocks Beach continue to be elevated. It is advised that you **avoid any water contact at these sites at this time**. This advisory is in effect until further notice. The bacteria levels at the remainder of the beach are within an acceptable limit.

The Town of Kennebunkport participates in the Maine Healthy Beaches program which is a cooperative partnership to test the water quality of Maine beaches.

Volunteers take tests once each week. If tests identify elevated bacteria levels, the public is notified to avoid water contact.

At this time, the Town of Kennebunkport will be increasing the testing frequency to nearly every day to assist in the determination of bacteria sources.
