

Beach Advisory-July 28,2005

Goose Rocks Beach Water Status

July 28, 2005 1:45 pm

The laboratory results are in for July 27.

All Goose Rocks Beach test site results are within acceptable levels. The entire beach and the mouths of the Little, Batsons and Smith River are open for water contact.

The Town of Kennebunkport participates in the Healthy Maine Beaches Program, which is a cooperative partnership to test the water quality of Maine beaches. Volunteers take tests once each week. If tests identify elevated bacteria levels, the public is notified to avoid water contact. At this time the town of Kennebunkport is increasing the testing frequency to daily to assist in the determination of bacteria sources.
