

## Beach Advisory - August 18, 2005

### GOOSE ROCKS BEACH WATER QUALITY STATUS

August 18, 2005

4 p.m.

The laboratory tests results are in for August 17. The water samples taken at the mouth of the Little River were elevated.

It is advised that you avoid any water contact at this site at this time. This advisory is in affect until further notice. The bacteria levels at the remainder of the beach and Colony Beach are within an acceptable limit.

The Town of Kennebunkport participates in the *Maine Healthy Beaches* program which is a cooperative partnership to test the water quality of Maine beaches. Volunteers take tests once each week. If tests identify elevated bacteria levels, the public is notified to avoid water contact. At this time the Town of Kennebunkport is increasing the testing frequency to daily to assist in the determination of bacteria sources.
