

Beach Advisory-August 19,2005

GOOSE ROCKS BEACH WATER QUALITY STATUS

August 19, 2005

1:45 p.m.

The laboratory tests results are in for August 18. We have just received the tests results from August 18th. There are elevated levels at Little River, Broadway Street, and Belair Avenue. The remainder of the beach is within acceptable limits.

The Town of Kennebunkport participates in the Maine Healthy Beaches program which is a cooperative partnership to test the water quality of Maine beaches. Volunteers take tests once each week. If tests identify elevated bacteria levels, the public is notified to avoid water contact. At this time the Town of Kennebunkport is increasing the testing frequency to daily to assist in the determination of bacteria sources.
