

Beach Advisory - September 1, 2005

GOOSE ROCKS BEACH WATER STATUS

September 1, 2005
2 p.m.

The laboratory tests results are in for August 31. The water sample taken at Broadway Street is elevated. It is advised that you **avoid any water contact** at this site at this time. This advisory is in effect until further notice. The bacteria levels at the remainder of Goose Rocks Beach and Colony Beach are within an acceptable limit.

The Town of Kennebunkport participates in the Maine Healthy Beaches program which is a cooperative partnership to test the water quality of Maine beaches. Volunteers take tests once each week. If tests identify elevated bacteria levels, the public is notified to avoid water contact. At this time the Town of Kennebunkport is increasing the testing frequency to daily to assist in the determination of bacteria sources.
