

## Kennebunkport Fire Department

### SOG 6

#### CIVIL EMERGENCY PREPAREDNESS

JAN 1990  
SEPT 1999

If the Fire Department becomes involved in an actual civil emergency where the Comprehensive Emergency Plan is activated, the Emergency Operations Center will be set up at the Communications Center. The highest ranking officer available will see that a fire officer of lesser rank is assigned to the incident scene. The officer at the scene will report all available information pertaining to the situation to the EOC.

If the situation is such that the ranking officer is able to be at scene this action should be taken. The officer then should assign other officers to provide any needed information required.

The Fire Department roll in a civil emergency will be that of joint authority and cooperation in solving the emergency. Fire situations will be under the command of fire officers as usual with other agencies there to assist. If the emergency is not fire department related then the Fire Department will serve in an assistance role.
